For more than 30 years, we have developed our innovative and modern vision of skin care in our Swiss research laboratory.

We present sophisticated and imaginative facial treatments, based on high-quality contemporary cosmetics combining :

- Pure Water from the Valais Alps
- Active ingredients derived from Swiss Botany

Treatment Institute beauty regimens are performed using our exclusive Hand Pressure and Rotation Technique : P.I.R. ® (*Pressure – Impregnation – Rotations*), while respecting the physiology of all skin types.

A Complete Beauty Program is prescribed at the end of each treatment to extend its benefits beyond the spa.
